

# **B/GRAFH™**

## **ADDENDUM**

**REVISIONS in 1.1.1**

**MAY, 1986**

**BATTERIES  INCLUDED**

*"The Energized Software Company!"*

## **GENERAL:**

- **CONTROL-1** has been disabled.

## **LABELLING MODULE:**

- When you are typing a label you may move the label around with a joystick. As you move the joystick, the speed of text movement will increase. To get back to the slower speed simply allow the joystick to come to rest in the centre position. If you press the fire button, the label will be erased. As the label is moved, the background under the label will continually be restored. The label only becomes permanent when you press the RETURN key, the ESC key, or one of the rapid cursor movement keys.
- When in the movement mode (no border lit up) you have three additional options.
  1. If you press **CONTROL-B** you will go into the box creation mode — the position of the upper left corner of the cursor becomes one of the corners of the box. The border will change colors and you can then move the cursor to determine the opposite diagonal corner of the box.
  2. Pressing the fire button tells the computer to draw the box.
  3. Pressing the ESC key aborts the box draw, and the dot at the starting corner is removed.

**CONTROL-L** - works much the same as Control-B except that you are determining the start and end location of a line segment.

**CONTROL-D** - enters the drawing mode. Every movement you make with the joystick will be followed by a drawn line. Pressing either the fire button or ESC key will exit the mode, but what you have drawn will remain in place.

**CONTROL-R** - will now invert the picture allowing a printout of white on black rather than black on white. This feature allows you to draw or put boxes in an area which is solidly filled. To do this, press CONTROL-R again and you will have a light box on a solid fill, for example.

- In slide shows you can now directly reference slides 21 to 30 by holding down the OPTION key and typing a number from 1 to 0 on the top row of your keyboard. Holding down the SELECT key while typing either of the same set of numbers will display slides 31 to 40.

## **FILE MANIPULATION:**

Three new features have been added to the sub-menu arrived at by pressing "Perform Algebraic Ops." Two of these are Forward and Backward differencing of Factor 1.

1. Forward differencing means that each value is replaced by the difference between it and the previous item. This causes the first element to become "NA".
2. Backward differencing is precisely the opposite. You subtract the next element from the current one. In this case there is a value for the first element but not the last.
3. On the "Perform Algebraic Ops" sub menu, "Noise Reduction By Fourier" has been added. This option smooths the data in Factor 1 by using Fourier transforms. You are asked for the degree of smoothing desired: this must be an integer between two and one half the number of points, less one. The higher the number the greater the emphasis on fit and not on smoothing. Note that this is a slow process, so turn off the screen for more rapid calculation. The higher the smoothing coefficient the longer the job will take. There may be no missing data points in Factor 1. The data in factors above 1 is wiped out. Factor 2 is the smoothed area.

# THE Premier Word Processing Package - CREATIVE COMPUTING

"PaperClip is easy to use, yet offers the advanced features of programs designed for the IBM PC. These include: block move, copy, delete, macros, automatic page numbering, headers, footers, underlining, boldface, super and subscripts, variable character pitch, and custom character sets. The editing screen can be set up to 130 columns wide, & text can be scrolled in any direction. A preview mode displays formatted text exactly as it will appear on the printed page. You may further define your own formatting parameters, including margins, line lengths, page length and spacing.

PaperClip contains over 30 printer files for all the current major models. The documentation is excellent and the disk itself unprotected, though keyed through a joystick port. This means you can make as many back-up copies as you like, but can use the program only when the key is inserted." - CREATIVE COMPUTING

"PaperClip is one of the easiest of the professional word processors to use, with a sensible manual and plenty of aids for the accident-prone." - COMPUTING NOW

"a 'must have' in an ideal software library" - ELECTRONIC LEARNING

"PaperClip is the Cadillac of word processors" - OMNI "...best professional word processor available" - RUN

"an excellent full-featured word processor" - THE BOOK OF COMMODORE SOFTWARE "hard to beat" - ACE

"So clearly superior, ...State-of-the-art word processing" - ANTIC "...most powerful of packages" - COMMODORE MAGAZINE

"So far as we are concerned, PaperClip is the top word processor running on a micro computer."

- HOME APPLICATIONS FOR THE C-64

"exceptional word processing" - INPUT "many features...easy to use" - ATARI EXPLORER

"You'll find yourself growing spoiled." - FAMILY COMPUTING "PaperClip is a logical evolutionary step forward." - AH-OY

"A superb word processor...the most sophisticated to date!" - COMPUTE "the ultimate word processor..." - ANALOG

"...does exactly what it was intended to do...and more" - COMMODORE MAGAZINE

"An excellent word processor...well designed...many advanced features!" - INFOWORLD

"...facts attest to its excellence!" - FAMILY COMPUTING

"You will not find a word processing package superior to this one!" - CREATIVE COMPUTING

# PaperClip™

## "The #1 Best Selling Word Processing Package"

- BILLBOARD'S COMPUTER SOFTWARE CHARTS!

Available for Commodore 64, Pet, all Atari home computers, and new enhanced 128K versions for Apple IIe/c, Atari 130XE and Commodore 128. New in 1986: Paperclip Elite for IBM MS DOS, Amiga and Atari ST.

### BATTERIES

### INCLUDED

30 Mural Street  
Richmond Hill, Ontario  
L4B 1B5 Canada  
(416) 881-9941  
Telex: 06 986-266

"The Energized Software Company!"

WRITE TO US FOR FULL COLOR CATALOG of our products for Commodore, Atari, Macintosh, Apple and IBM systems.  
FOR TECHNICAL SUPPORT OR PRODUCT INFORMATION PLEASE PHONE (416) 881-9816

1985 BATTERIES INCLUDED. MACINTOSH, APPLE, ATARI, COMMODORE AND IBM ARE REGISTERED TRADEMARKS RESPECTIVELY OF APPLE COMPUTERS INC., ATARI INC., COMMODORE BUSINESS MACHINES INC. AND IBM BUSINESS MACHINES INC.

\* as compiled from national retail store sales reports for week ending January 3, 1985
